

Supplemental Figure Relative abundance of WT-LAMP-1 G378, and Y379A in the plasma membrane fraction

WT-LAMP-1, G378, and Y379A in fractions 1-3 in Fig. 3 are defined as plasmalemmal counterparts. Fractions 4 and 5 are excluded from the plasma membrane fraction because these two fractions contain significantly early endosomes.⁷⁾ The data are shown as the means \pm SE from four independent experiments. * $P < 0.01$.
