

Supplemental data

Supplemental Figure Effects of Delphinidin on RANKL-induced Osteoclast Differentiation

Raw264.7 cells were cultured for 5 d with or without sRANKL (100 ng/mL) and Delphinidin (Del) (30, 60, 120 μM). The number of TRAP-positive osteoclasts was counted. Data are expressed as the mean \pm S.E.M. of 4 independent wells. Bar=200 μM .
